

"Happy Planet" on KLCS for EARTH DAY CELEBRATION:
Thursday April 21 11:00 am

We would love for all teachers, students and community friends to be apart of the eco-friendly experience on Earth Day (April 22nd)! So please pass this email to all friends and teachers so that it can be viewed, recorded and shown in classrooms to engage everyone in this global cause and allow us to participate in our kids community movement! LAPD Officer Brooks explains, "This courageous group of kids has set out to make a difference. They aren't looking to merely survive a city filled with gang violence; they are out to save the planet!"

The grassroots documentary follows inner-city youth on an educational journey, as they learn why the Earth is in trouble and what they can do to help it. As the kids visit various LA-area eco-hotspots, they learn hands-on lessons about energy conservation, eco-friendly practices and green efforts, supported by recycling tips from *Actor/Environmentalist Ed Begley Jr..*

Let's help make it a happy planet!
